

WOOP technique

<p>Wish/goal</p> <p>Scoring a first class in the practical investment module in my third year and learn from the course.</p>	<p>Outcome</p> <p>It would be great to help me in practising and improving my investment techniques, while contributing to a better overall third year result which increases my employability. It also helps me to understand different techniques in investment and let me practise investment with a experienced investor/lecturer.</p>
<p>Obstacles</p> <p>As the course requires students with a strong foundation in finance and investment, I have less knowledge about this coming from an accounting background compared to my peers with strong involvement with banking/investment related course.</p> <p>I might also face difficulty in the practical session which requires me to possess knowledge of accessing different databases such as Bloomberg that</p>	<p>Plan</p> <p>I will need to start structure a plan for learning the databases. This requires me to get certified for Bloomberg(which can be done in AMBS).</p> <p>I will also need to brush up on my knowledge of investment and finance. This requires me to reread and understand notes for certain courses I had in the second and first year such as foundation of finance.</p> <p>I would also need to make a revision plan for the course itself and continuously revising it to avoid cramping all revision at the last minute.</p>
